Tracklisting

Side A 1) Equanimity 2) Solum Ferrum Side B 1) Desolate Hub 2) Astrum Side C 1) Premiata 2) Frozen Surface Side D 1) Sulphur Vent 2) JMA020603	
---	---

About this release

Although he's only had a handful of releases since his debut on the Detroit label Matrix in 1995, Convexion has remained a byword amongst the techno upper-crust for his brand of cerebral, passionate, fantastically textured music, and has garnered a cult following -- including DJ's ranging from Derrick May & Kenny Larkin to Danny Tenaglia & Swayzak. The evolution of his sound reflects his roving infatuation with great sonic architects: he was inspired early on by the Cocteau Twins, Joy Division and early 4AD releases, and later discovered the beauty of Derrick May's strings, Virgo's basslines, the Burrell Bros.' grooves, Juan Atkins' Deep Space vistas and the relentless pulse and mesmerizing echoes of Basic Channel (which catalyzed the Convexion sound after he heard it played by Paul Johnson one night at a club). A quick glance at Discogs shows that his releases are cherished and highly sought-after by both DJs and collectors, fetching high prices on eBay and at specialty vinyl shops. Long awaited and long overdue, his debut album contains 8 essential tracks recorded between 1996 and 2006. It's limited to 500 copies, so bug your local wax pusher to get some to your neck of the woods before it goes out of print.

Label Bio

Down Low Music is a little label based in the deep south of the USA (primarily Dallas/Fort Worth, Texas), where we sit around eatin' BBQ and soppin' biscuits in gravy. We are big fans of classic dance music of all kinds, and especially the electronic moods of Detroit and Chicago. We strive to release quality dance records that stand the test of time, and that do everything from making you jit in a club to stroking your chin while hanging-back by the wall.

Upcoming Releases

dLVEXTCD Convexion CD (the CD version of dLVEXTLP, featuring tracks not included on dLVEXTLP)
dL013 The Connection Machine – Pijn 12"
dLNEBLP Nebraska 2x12" & CD (album of deep house and technosoul from a former Ferox Records artist)
