About this release

Revived is the Delsin sub-label Ann Aimee! Once again outlet for the more experimental sides of Delsin's electronic music. After the superb fine release by James Kumo, another fine debut EP. This EP is done by Delta Funktionen, who goes in real life by the name of Niels Luinenburg. 23 years old - living in the northern part of Holland. He's inspired by Maurizio, Basic Channel, Convextion, Carl Craig, Steve Rachmad, Jeff Mills, Robert Hood, and others.

This magnificent debut EP, he brings in twice high quality dark atmospheric techno deepness. 'Nebula' is the more straight forward track, thick pounding rhythm and vibes make it ending up somewhere between Mills & Maurizio, raw straight techno. 'Estuary' gives some deeper dubby vibes, but still with the forward going energy, which a lot of the dubtechno seem to lack these days. The superb artwork is done by another Delta, namely Delta Inc.
